Task 3 First Draft Checklist

GPU sharing for multi-tenant inference

Checked 21 October 2026 Pakistan time

GREEN: stated draft task complete. YELLOW: present but incomplete or unverified. RED: not completed. Green certifies the listed task only, not final research correctness or marks.

All 25 mandatory deliverables have draft material. The research remains a bounded review with 559 retained records unassessed. A score of 100/100 cannot be certified before the remaining checks and instructor assessment.

Task 3 setup and recovery

Status	Task and evidence
GREEN	**Create the separate task3 folder** Baseline, logs, papers, benchmark, report, workbook and scripts folders exist.
GREEN	**Preserve the supplied Task 2 package** Report, 14-tab workbook and PRISMA files retained in baseline.
GREEN	**Preserve the submitted Task 1 protocol** Original protocol remains unchanged.
GREEN	**Separate old Task 2 counts from the later Task 3 baseline** Current corpus and limitations stated in Task 3 README and report.
GREEN	**Recover the interrupted workspace** Recovered report source, analytical records, workbook and 18 reading PDFs.
GREEN	**Keep stable report and study identifiers** 21 report versions map to 20 studies; REEF companions linked.
GREEN	**Create the heading-by-heading checklist** HEADING_BY_HEADING.md and Requirements.csv exist.
GREEN	**Retain activity and retrieval records** Actual checkpoint times, source URLs, hashes and retrieval statuses recorded.
GREEN	**Keep third-party reading copies out of public Git** Catalogue and metadata may be published; full texts remain separate.
YELLOW	**Publish the recovered deliverables to GitHub** Earlier Task 3 baseline is remote; recovered draft push previously blocked by automatic approval review.

Paper access and evidence verification

Status	Task and evidence
GREEN	**Catalogue all 21 report versions** Manifest contains report ID, study ID, title and source.
GREEN	**Recover 18 valid reading PDFs** 18 copies available locally; this does not mean all source claims were checked.

Status	Task and evidence
RED	**Obtain InferFair P018 reading copy** DOI 10.1016/j.future.2023.08.020; valid PDF not recovered.
RED	**Obtain ArkGPU P019 reading copy** DOI 10.1007/s42514-023-00154-y; valid PDF not recovered.
RED	**Obtain Dyna-P P020 reading copy** DOI 10.1007/s10586-025-05284-2; valid PDF not recovered.
GREEN	**Provide a separate journal benchmark PDF** Hong et al., ACM Computing Surveys, DOI 10.1145/3068281; structural benchmark, not a primary study.
YELLOW	**Verify all report versions and bibliographic fields** Companion/version checks and full bibliographic audit remain.
YELLOW	**Verify all 52 outcome anchors against full text** Inherited extraction is preserved; complete source-by-source recheck is not evidenced.
YELLOW	**Verify all 200 QA judgments** Scores and arithmetic exist; independent item-level verification remains.
RED	**Complete independent reviewer signoff** No signed independent item-level verification is supplied.
RED	**Resolve 559 retained records or obtain scope acceptance** These are not technical exclusions; bounded selection must remain disclosed.
YELLOW	**Verify completeness of historical search provenance** Queries/logs preserved; missing event details cannot be reconstructed as performed searches.
RED	**Complete a current survey novelty check** Benchmark selection does not establish novelty against recent surveys.

Heading 23 mandatory deliverables

Status	Task and evidence
YELLOW	**01 SLR report** Complete first-draft text exists; scientific verification and final closure remain.
GREEN	**02 Defined engineering problem** Report section 1 states the decision, constraints and competing requirements.
GREEN	**03 Research objectives** Report section 1 contains the objectives.
GREEN	**04 Three to five research questions** Five protocol RQs retained in section 2.
GREEN	**05 SLR protocol** Submitted Task 1 protocol preserved and included in the first-draft package.
GREEN	**06 Databases and justification** Draft methodology explains the database coverage.
YELLOW	**07 Complete search strings** Recorded queries are reproduced; reproducibility/provenance gaps remain.

Status	Task and evidence
GREEN	**08 Inclusion and exclusion criteria** Criteria and implementation deviations described.
YELLOW	**09 Database-wise results** Recorded counts available; historical search audit remains qualified.
YELLOW	**10 Search and screening log** All baseline records retained; 559 retained records unassessed and many lack abstracts.
GREEN	**11 Duplicate-removal record** 114 links retained; current count arithmetic reconciles.
YELLOW	**12 PRISMA 2020 flow diagram** Supplied bounded-review flow reproduced; exhaustive final screening is not established.
YELLOW	**13 QA checklist and scores** 200 items and reconciliation present; judgment verification remains.
YELLOW	**14 Included primary-study list** 20 studies / 21 reports listed under the supplied bounded scope; version and scope checks remain.
YELLOW	**15 Data-extraction sheet** 52 reported outcomes and two calculations preserved; source verification remains.
GREEN	**16 Taxonomy** Mechanism taxonomy drafted in report and workbook.
GREEN	**17 Comparative evidence matrix** Context-aware comparison matrix drafted; source-check limitation remains global.
GREEN	**18 Engineering trade-off analysis** Utilization, latency, fairness, isolation and implementation costs discussed.
YELLOW	**19 Conflicting-evidence analysis** Draft distinguishes contextual contrasts from direct disagreement; deeper matched comparisons remain.
GREEN	**20 Answers to all research questions** All five RQs have draft synthesis answers.
GREEN	**21 Evidence-based engineering recommendation** Conditional recommendation table includes benefit, sacrifice and alternative.
GREEN	**22 Research gaps** Gaps linked to limitations of the reviewed corpus.
GREEN	**23 Threats to validity** Bounded scope, abstracts, access, reviewer and comparability limitations disclosed.
YELLOW	**24 Complete references** BibTeX and numbered references exist; final author/title/venue/version audit remains.
GREEN	**25 Supporting verification files** Baseline, CSVs, matrices, build scripts and technical validation included.

Heading 24 report structure and draft files

Status	Task and evidence
GREEN	**Introduction** Background, problem, motivation, objective and contribution present.
GREEN	**Research questions** Five RQs present.
GREEN	**Research methodology** Protocol, databases, search, criteria, selection, QA, extraction and synthesis present.
GREEN	**PRISMA selection section** Counts, corpus table and supplied flow present with scope caveat.
GREEN	**Taxonomy section** Technical categories and assumptions present.
GREEN	**Results and synthesis section** Organized by RQ rather than only paper summaries.
GREEN	**Comparative analysis section** Matrix with metric/context interpretation present.
GREEN	**Engineering trade-offs section** Benefits and sacrifices present.
GREEN	**Discussion section** Context, conflicts and uncertainty discussed.
GREEN	**Recommendation section** Condition-specific choices and alternatives present.
GREEN	**Research gaps section** Evidence-limited future research directions present.
GREEN	**Threats to validity section** Review limitations and remaining checks present.
GREEN	**Conclusion section** Conditional conclusion present.
GREEN	**References and appendices** Search register, study cards, QA, outcomes, calculations and deliverable crosswalk present.
GREEN	**Compile the PDF** 107-page first draft compiled without material LaTeX warnings.
GREEN	**Supply editable LaTeX and bibliography** main.tex, included TeX files and references.bib present.
GREEN	**Supply editable Excel workbook** 27 tabs; original 14 tabs preserved apart from equivalent QA numeric conversion.
GREEN	**Check workbook arithmetic** Count and QA reconciliation differences are zero.
GREEN	**Supply Word companion** Generated from the same TeX; fixed dropped numeric cells in conversion.

Status	Task and evidence
YELLOW	**Complete detailed visual and editorial review** Rendered overview checks and selected full-size checks performed; final page-by-page editorial review remains.
GREEN	**Assemble portable first-draft ZIP** Includes report sources, outputs, workbook, logs, protocol, guidelines and build instructions.
