Task 3 progress and remaining research

30 studies across 31 reports. Continuation eligibility: 16/334 closed, 318 open. Whole-review selection and historical search reconciliation remain incomplete.

Each bar has its own denominator. These percentages must not be averaged into an overall completion score.

Canonical records with a closed status: 3757/4075 (92.2%). Includes screening exclusions; not overall SLR completion.

Continuation screening decisions: 559/559 (100.0%). Title/abstract stage; title-only evidence explicitly retained.

Continuation eligibility decisions: 16/334 (4.8%). 10 included and 6 full-text exclusions.

Added included PDF copies verified: 10/10 (100.0%). Only the ten additions; not all advanced records.

Included-study QA items recorded: 300/300 (100.0%). Current 30-study corpus; independent checks separate.

Included outcome rows integrated: 90/90 (100.0%). Current 30-study corpus; source observations, not pooled effects.

Main report sections present: 13/13 (100.0%). Presence only; not final research compliance.

Required deliverables mapped: 25/25 (100.0%). Mapped to files; not all conditions closed.

Status against every guideline heading

Statuses describe the recorded draft. Percentages are omitted when no objective denominator exists. Drafted does not mean independently verified or fully compliant.

No	Requirement	Current status
1	Background	Drafted
2	Engineering problem	Drafted
3	Objective	Drafted
4	SLR methodology	Documented with open selection
5	Initial activities and RQs	Drafted
6	Protocol	Preserved; later amendments separate
7	Databases	Documented; coverage deviations remain
8	Search strategy	Recorded; historical run mapping incomplete
9	Literature period	Specified
10	Eligibility criteria	Specified; application incomplete
11	PRISMA selection	Open; 318 candidates unresolved
12	Search and screening log	Recorded; eligibility still open
13	Quality assessment	300 items recorded for included set
14	Data extraction	30 study forms and 90 outcomes
15	Taxonomy	Integrated for assessed set
16	Comparison	Integrated with comparability limits
17	Engineering trade-offs	Integrated for assessed set
18	Conflicting evidence	Included; adverse results retained
19	RQ synthesis	All five RQs drafted
20	Recommendation	Conditional recommendations drafted
21	Research gaps	Derived from assessed evidence
22	Validity	Limits documented
23	Mandatory deliverables	25 mapped; final closure incomplete
24	Report structure	13/13 main sections present
25	Analytical standard	Integrated for assessed set
26	Research quality	Traceability present; selection/provenance open
27	Engineering answer	Drafted; bounded by assessed set
